

Plan to overcome weaknesses

- Practice competitive coding daily and participate in maximum possible coding competitions.
- Take opportunities for public speaking from various co-curricular groups and activities.
- Increase public communication by interacting with various people around.

Short term goals

- Get an internship for web development.
- Master and apply concepts of OOPL.
- Give more attention towards Competitive Coding.

Long term goals

- Study and apply knowledge of Machine Learning and Artificial intelligence.
- Develop public speaking skills.
- Master various Data Structures and Algorithms through competitive coding.
